NEVADA DEPARTMENT OF TRANSPORTATION
SUPPLEMENTAL NOTICE NO. 1 to RFP NO.049-13-016

Reference is made to the Request for Proposal to Service Providers for I-80 Fiber Optic Network Upgrade along I-80 from Fernley to Wendover, upon which proposals will be received until 3:00 p.m., local time, on March 20, 2013.

Please include the following language in Section I – Instructions to Proposer in the Request for Proposal:

Integrator's attention is directed to the State Contractor's License Law requirement (NRS 624 as amended to date). The NDOT has received an Advisory Opinion from the State Contractors Board which indicates that contractors holding an A (General Engineering); AB (General Building and Engineering); C2 (Electrical); and C2 (e) (Signal System) could act as the prime contractor for the project. While it is not necessary for the Contractor to be licensed at the time of proposal submittal, it might be worth their immediate attention to apply for licensure now, as the proper license will be required upon execution of the agreement.

The system integrator and its Project Manager shall comply with the Registration Requirements of Chapter 625 of the Nevada Revised Statutes (NRS), Professional Engineers and Land Surveyors, at the time of submission of the proposal. Such individual(s) must actually be employed by the consulting firm that is submitting the proposal for consideration by the Department. All companies doing work for the Department is required to be prequalified in the appropriate discipline prior to commencing work. A firm cannot meet the registration requirements of NRS, Chapter 625, for prequalification purposes, by "borrowing" such a person from another firm under the guise of a "Joint Venture" submission. If a RFP provides for prequalification as an initial step and the RFP is for an engineering discipline, each firm of a Joint Venture must prequalify by having a Nevada licensed Professional Engineer/Land Surveyor on staff. Each firm must stand alone in this requirement. However, if a proposal is submitted from a "Joint Venture" in response to a RFP for an engineering discipline and both firms have previously prequalified, only one Nevada licensed Professional Engineer/Land Surveyor need to be identified as a member of the team being proposed. The individual so named must be a Nevada licensed Professional Engineer/Land Surveyor at the time of submission. Pending licenses do not qualify.
