

Description

The USA Parkway Project is a transportation link between Interstate 80 (I-80) in Storey County and US Highway 50 (US 50) in Lyon County, approximately 18 miles total. A six-mile portion of the roadway already exists in Storey County servicing an industrial center. This estimated \$70 million project linking I-80 and US 50 will enhance local and regional access and mobility. It will provide an alternative route for traffic in case of an emergency or closure on I-80, US 50, or US 95A. USA Parkway will support planned land uses and economic development and will improve efficiency of freight movement from areas east of Reno to points south.

Current Status

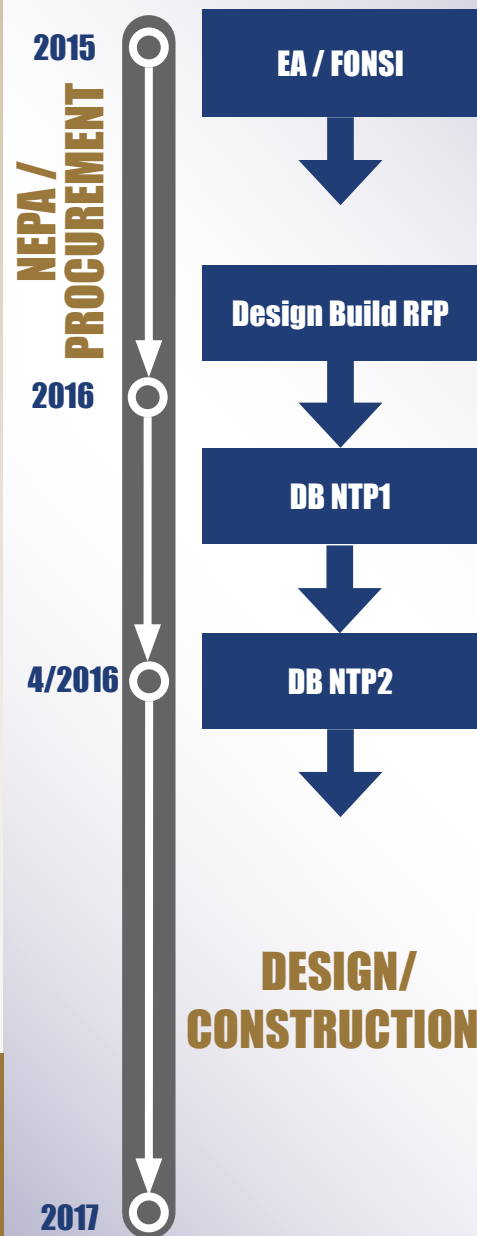

The Nevada Department of Transportation (NDOT) completed the NEPA process in December 2015, the Design-Build Procurement process was completed and NDOT issued the first Notice to Proceed (NTP1) on January 11, 2016. Ames Construction (Design-Builder) was awarded the \$75.9M Contract. The Design-Builder completed NTP1 work to gain approval to begin the design phase. This work primarily

consisted of the Project Management Plan, Design Quality Control Plan and Construction Quality Control Plan and upon completion of this work received NTP2 on April 29, 2016. NTP2 allows the Design-Builder to proceed with design and construction. The design is progressing well, allowing the Design-Builder to be on schedule to start construction in June 2016. The Design-Builder has already submitted the Release for Construction (RFC) package for Work Area (WA) 1. RFC for WA 2.4 (Rough Grading) is scheduled for early June 2016 and the remainder of WA 2 RFC scheduled for late June 2016. These three packages have been completed and accomplished through a Project Team Partnership leading to 18 miles of construction work beginning this summer. The remaining package, WA 3, is scheduled for RFC in September 2016 and will construct the intersection of USA Parkway and US 50. All work is on schedule to be completed by December 2017.

Next Steps

Ground breaking is scheduled to start in June 2016. The Project Team will continue with the completion of the design for all packages and complete construction by December 2017.
