7.2.3.	Report	26
7.2.4.	Reset.....	26

1. Introduction

The Survey Monument Location Information System (LoIS) was designed and developed by GeoDecisions in cooperation with the Nevada Department of Transportation (NDOT).

LoIS was developed to assist NDOT with distributing survey monument information to Nevada DOT personnel and all other Nevada professionals with need for survey monument information.

This Online Help document provides all the information needed to access and use LoIS, including:

- basic installation and set up guidelines,
- command and toolbar functions,
- map interface instructions,
- workflows for querying survey monument information, and
- reporting and map printing processes.
