Permanent Sign Items have different documentation requirements for each unit of measure (UOM). All Permanent Sign Items must be counted, measured and calculated, or based on plan. Documentation examples for a few selected sign items are illustrated in this chapter. Some minor modifications may be required to show the unusual circumstances that may occur with different items, but the general format should be followed. If there are items which cannot be documented according to the following examples, contact the Construction Admin Services Section for assistance.
